

Supplies for activities needed:

- One piece of white paper
- One piece of construction paper (any color)
- Scissors
- Glue
- Markers, crayons, colored pencils, etc

Activity Name: Name Snowman

- School Readiness Outcomes (SRO) goals met:
 - Identifying Letters in the Alphabet, especially those in their name
- Instructions
 1. First, you are going to cut out as many circles as you have in your name, and then another one to be the head of the snowman out of the white piece of paper. The circles only have to be big enough to fit one letter from their name. Each circle is going to be a part of the body of the snowman.
 2. Next, have your child count how many circles they cut out, make it a point to show them that that is how many letters they have in their name. You can also have them line the circles up on their construction paper as they want, making a snowman-like figure and then glue them down.
 3. Once they are glued down, have your child make the face of the snowman as well as other parts they want to add, such as the eyes, nose, mouth, arms, etc. Make sure you leave most of the circles blank so that they can add their letters in the next step.
 4. The next step is to have your child write one letter from their name going down the snowman. For example, if their name is Sally, you'll have the S on the top and continue the name down the circles. This is a great time to go over how each letter sounds in their name as well!
